

MyMyk SmartLynk PLUS: Ready For Anything for “People on the Move”

SYDNEY, AUSTRALIA: MyMyk has again proven to have its finger on the (racing!) pulse of the go-anywhere filmmaker. MyMyk’s new SmartLynk PLUS featuring “Plug and Power”, is a compact, robust, lightweight audio device, packed with professional features that are sure to make it an indispensable addition to the kit of photographers, journalists and filmmakers who have adopted compact pro-format cameras, such as the models from the Sony Alpha range , Panasonic, Olympus and many of the new cameras emerging in this category . MyMyk is responding to the demand for professional audio quality and greater flexibility to match the impressive picture quality delivered by these compact cameras. With its superior componentry, SmartPhone interface, Split and Mix functions, and more, SmartLynk PLUS truly delivers, all in a compact and lightweight form factor, matching the physical dimensions of these powerful cameras.

More About SmartLynk PLUS

SmartLynk PLUS is a robust, compact design, portable/on-camera, two-channel audio mixer and monitoring device. Weighing in at only 180 gms including batteries. The two 3.5mm microphone inputs feature Plug and Power to provide power for lapel and non-powered on-camera microphones without the need of external power supplies or draining power from the camera. A combination of unpowered as well as self-powered microphones can be used simultaneously. SmartLynk can also be used as an on-camera monitoring device for portable wireless receivers.

Additional SmartLynk PLUS Features:

- A record and playback interface to a smartphone/tablet: record to the MyMyk Camera Audio or MyMyk Reporter iOS apps
- Built-in powerful 250mW headphone amplifier that allows monitoring of the microphone inputs prior to and during recording
- Split and Mix function to route the microphone to a mixed or separate output
- Doubles as an on-camera audio monitor for portable wireless receivers
- AGC block circuit which removes unwanted AGC noise from the camera by overriding the camera's built-in Automatic Gain Control (AGC) — useful for cameras that don't have manual built-in control or to take advantage of the Smartlynk PLUS's speed and ease of use
- Enables audio to be simultaneously recorded on two camera devices, including smartphone/tablet cameras and action cameras (optional MyMyk Connector cable required).
- Enables a split of two microphones into the left and right channels of the camera and with individual record level control, a feature not possible on the camera. True Stereo recording can be achieved with this function.
- Electronics made in Australia, high quality German-manufactured sockets and switches used through all MyMyk products.
- Price: \$249.00
