Microphone
for action cameras

sportsmyk

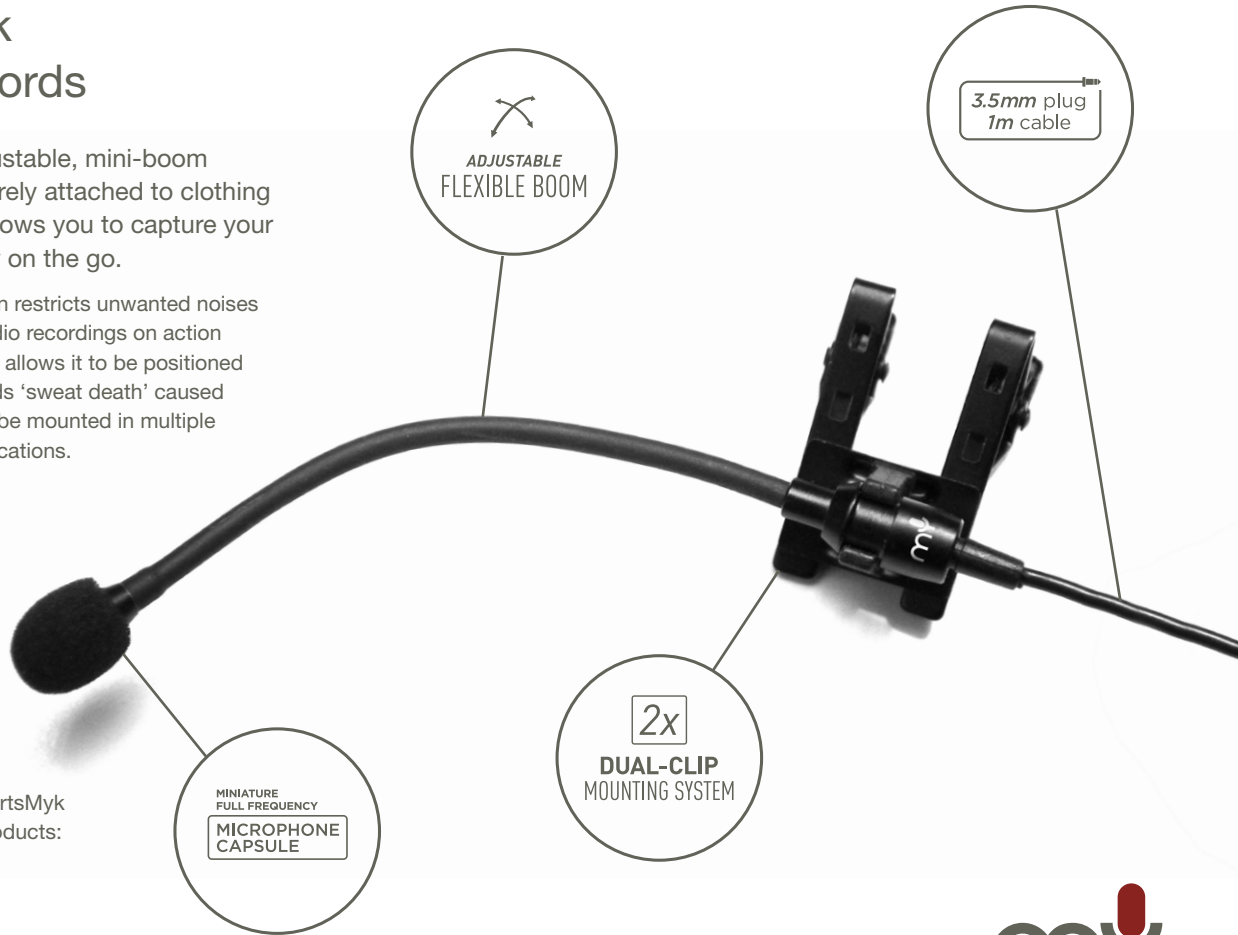

Actions speak louder with words

SportsMyk is a fully adjustable, mini-boom microphone that is securely attached to clothing or a helmet strap and allows you to capture your own sports commentary on the go.

Its robust and discrete design restricts unwanted noises normally associated with audio recordings on action cameras, and its flexible arm allows it to be positioned close to the mouth and avoids 'sweat death' caused by body contact. It can also be mounted in multiple positions for numerous applications.

- ✓ BMX and action cycling
- ✓ Motor sports
- ✓ Horse riding
- ✓ Car dash cams
- ✓ Cycling
- ✓ Snow sports
- ✓ Skateboarding
- ✓ Rock climbing
- ✓ Rowing
